Why ho's been pelting my haise with pieces of ice. He ought to be thrashed for it, and, if you'll let me punish him as ine deserves, I'd give you five dollars for the privilege."

The dector placed a five dellar greenback in the woman's hands, and dragging the struggling foungster to his vehicle, he took the whip from its socket and the next minute the urchin was doucing a minute that would have done no di-credit to Yrea Marthias. Having Lished the boy's legs until he thought the lesson complete, the dector jurged in his vehicle, while the key ran howling past his mother and up the athey-way. Peerless Cooking Stove Here is the opinion of the editor of the Boston Journal.—We have been very much pleased in examing a stove of this pattern, manufactured by Mosers. Pratt & Wentworth of R xbury for the Paris Exposition, at the store of W. F. Shaw & Co., 160 Washington Street. It is one of the most beautifully finished strictes of bisions furniture we have ever seen the month in mobile.

kitchen forniture we have ever seen, the mouldings being stack flaished, the knobs and handles silver plated, the tank and hot closet are made of German silver, all the hollow ware used on the stove is finely cosmelled, and the tea-kettle is of burnished copper.

Among the peculiar merits claimed for this slove is the complete ventilation and even temperature is the complete ventuation and even temperature of the even, making it a rossing rather than a baking even, which is secured by a peculiarly constructed air-chamber, which heats the sit as it passes down behind the fire pot and into the oven, causing the even to bake or coast perfectly and evenly, a great desideratum with a careful housewife, the market and rather which each be known or as the number of the processing of the evenly which each be known over

eventy, a great desideratum with a careful home-wite; the perfect control which can be kept over the fire, and its cleanliness. This store works equally well with coal or wood. These stores are of different sizes, and are made plain or with an extension top, the latter being made with a large reservoir for het water on the top, and a warming closet underneath.
